

Digital Invoice Capture

Our digital invoice capture technology leads the market, combining advanced AI & Machine Learning technologies with OCR that ensure the highest level of accuracy, with the minimum amount of work for our customers.

Simple - Fast - Convenient - Affordable

Our digital invoice capture software represents the simplest way to capture invoice data, delivered as a service, for the ultimate customer experience.

We use OCR technology for paper invoices, however, over 85% of the \$15bn invoices we process are already being received by email from vendors as digitally rich PDFs. Extracting this data is faster, more accurate, & cheaper, replacing OCR as paper invoice volumes decline.

What does Digital Invoice Capture do?

- ✓ Invoice capture in any language, currency, or format
- ✓ Including line level data extraction
- ✓ PDF, doc/docx, xls/xlsx, htm/html file types accepted
- ✓ Fixed price per invoice, no additional charges
- ✓ Eliminates duplicate invoices

Why do you need Digital Invoice Capture?

✓ Make time for more important work

Working with paper invoices is inefficient. It keeps buyers & budget holders in the dark as all of this valuable information is hidden away in filing cabinets & the ERP software.

Capture every invoice, delivering instant access whether tracking it through approval, posting & even payment status, helping AP with 100% visibility of every transaction & aiding budget holders to spend smarter & more effectively.

✓ Available as a stand-alone capability or part of your purchasing automation solution

Our digital invoice capture services is replacing old OCR technologies as a stand-alone service because it is faster, more accurate, efficient, convenient & considerably cheaper per transaction processed.

Capture is the core capability for every successful AP & purchasing automation project, removing all of the paper at the outset to deliver 100% visibility & control over the AP function.

✓ Saving time, saving money

Digital invoice capture, when combined with AP & purchasing automation saves a huge amount of time. Once the invoice is captured, it is permanently available whether to handle credit control calls, query management or audit reviews – plus all of the space you no longer need to hide them in filing cabinets.

FAQs

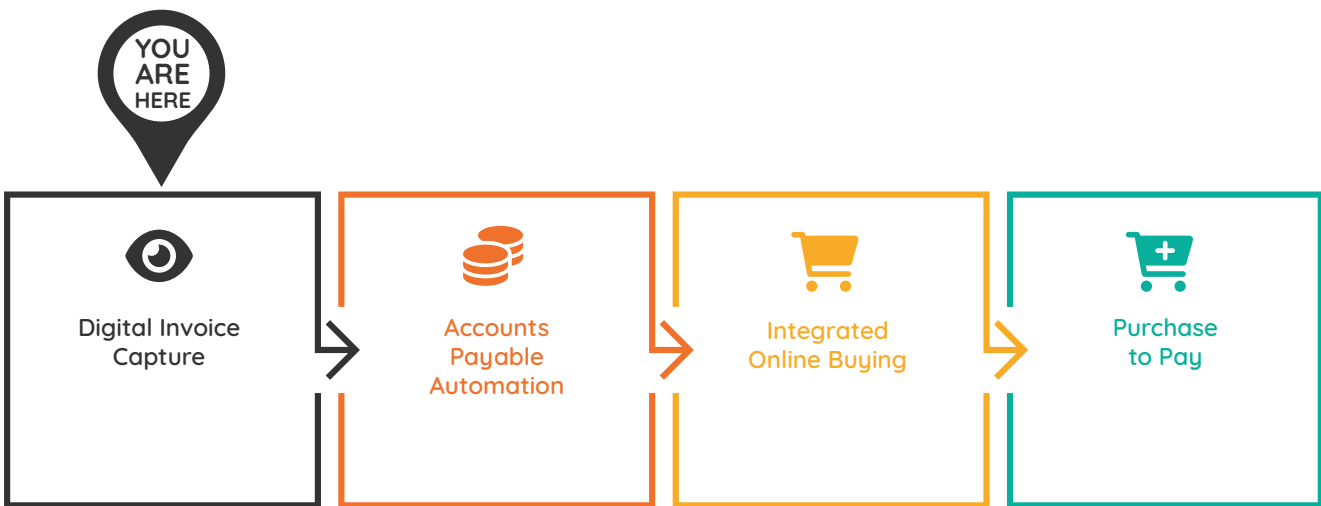

? Can I just use Digital Invoice Capture?

Yes. AP Automation, P2P, & Online Buying can all be added as & when required.

? Does Digital Invoice Capture offer mobile support?

Yes. Compleat’s downstream invoice processing applications receive invoices & they have mobile apps to streamline the approval process, making it faster & easier for you to approve the invoices even when you’re away from your desk. If you use Digital Invoice Capture without a Compleat application, you will have to use another application to approve invoices.
