

Integrated Online Buying

Empower your staff to buy online, & control what they buy, before they buy it, whilst automating the entire AP process

Buy online with Integrated Online Buying

Every organization is buying more online – but as a totally disconnected & uncontrolled activity from the finance function.

This generates a lot of additional work for AP to process: expense claims, corporate credit card reconciliations & P-Card statements, finding the invoice, determining who bought what & why for GL coding, & the associated invoice approval processes.

Integrated online buying delivers 100% visibility & control over spend before it takes place.

It delights purchasers because it is fast, convenient, & almost always cheaper to buy online, helping budget holders to maximize their budget by stopping unnecessary & maverick spend before it takes place while putting finance in total control.

Our UNIQUE integrated online buying is available for almost any online website store, but includes Amazon Business & an ever growing number of global vendors.

What does Integrated Online Buying do?

- ✓ Optimum buying experience at disruptively low costs
- ✓ Digital end-to-end process of requisition, PO, receipting, invoice capture, & approval
- ✓ Integrated with ANY vendor website
- ✓ World first “Punch In” integration with Amazon Business
- ✓ Visibility & control of spend before the order is placed
- ✓ Guaranteed invoices & POs match
- ✓ Auto GL coding & approval workflow
- ✓ Approval workflow email notifications both pre-order & invoices from any device
- ✓ Productivity gains of up to 95%
- ✓ Pay less for what you already buy - online is almost always cheaper
- ✓ Auto-update budget management (if implemented)
- ✓ Access to historical pricing for comparison

Why do you need Integrated Online Buying?

✓ Because everyone wins!

Integrated Online Buying is an easy & fast win for every organisation. It saves so much time both inside & outside of the finance function (up to 95%!), often for the high volume of low value invoices that just clutter up the works.

It provides finance & budget holders with total control over all spend before it takes place, then fully automates the invoice capture, match & associated approval process.

Better still, pricing online is almost always cheaper, stretching budgets to go further.

It is also the ideal first step along the Purchase to Pay journey, driving high adoption of new disciplines that make it much easier to automate all “requests to buy” - as & when you are ready.

Integrated Online Buying delivers the ultimate “end to end” digital purchasing experience for everyone involved, the buyer, budget holder, finance & the vendor. Everyone wins.

✓ Full control with Commitment & Accrual accounting

Finance gains full control over spend before it takes place, introducing full commitment & accrual accounting for every online purchase. Plus, total control over the available vendor websites - who can access them, what can be purchased, & even the associated agreed pricing.

Consolidate all of those small vendors that take so much time, increasing your spend with the preferred vendors & drive down your costs.

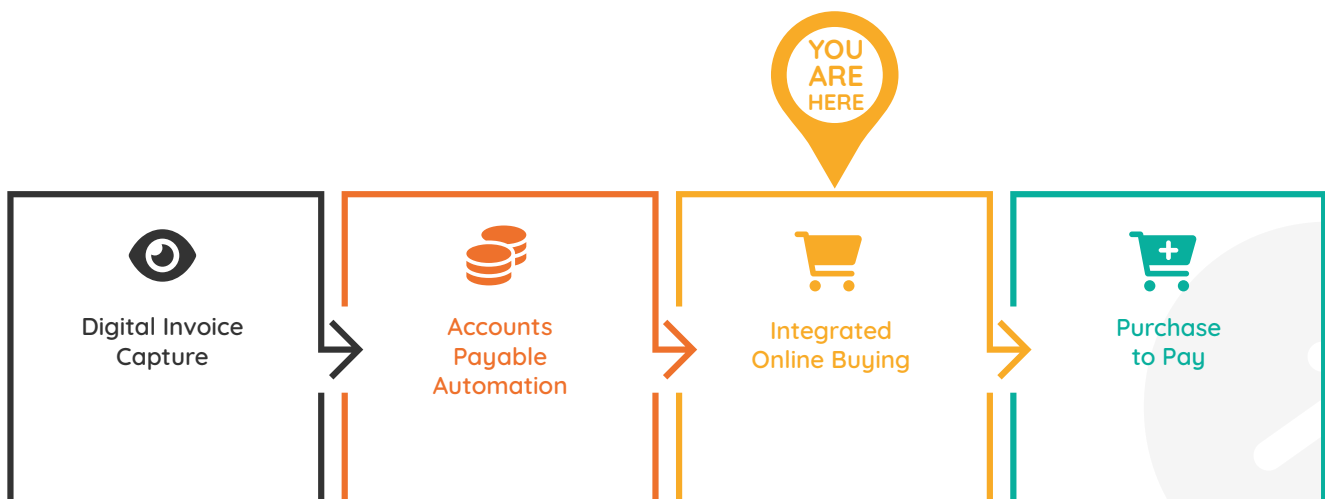

Win the hearts & minds of everyone outside finance, by making their lives easier, saving them time & improving their productivity

✓ Punch In with Amazon Business

Our close working relationship with Amazon Business has delivered the World First “Punch In” integration for the ultimate integrated buying & accounting experience.

The buyer simply logs directly into the Amazon Business website & buys in the normal way. On purchase, the order is suspended & dropped into Compleat for GL coding & approval. On final approval the order is released for fulfilment. The invoice is automatically captured, matched, & sent for approval & on final approval posted to your ERP. Simple!
